

# Student Internet Use

- 1. Each and every time** you want to use the Internet you must have permission from a teacher who is willing to supervise you. Substitute teachers are **not** permitted to give permission or supervise. In the **library** you must have permission from your classroom teacher **and** Mrs. Bowman unless your classroom teacher is present.
- 2. All Internet use must be for appropriate educational purposes.** You must clearly state what your purpose is to the teacher that will be supervising you. You may be asked by **any** staff member to explain what you are doing and why, please be prepared to provide that information.
- 3.** Your User ID and password may not be used by anyone other than you. Permission to use the Internet is for a **single** student only. A supervising teacher may allow a group activity, but only if each and every student in that group has Internet permission. Do not allow other students to watch you unless they also have Internet access and permission from a supervising teacher.
- 4.** Any downloads (saving to a disk or printed copies) from any Internet website requires permission from the supervising teacher.
- 5.** Internet information is not always accurate. Know your sources and check your “facts”.
- 6.** Visiting “Chat Rooms” is prohibited unless you are sharing educational information and have permission from your supervising teacher. Off site email use is not allowed. You must sign the necessary document and get added to the districts email through Mr. Fowler. It will involve specific training for email use.

This document is not meant to replace the **Morrow County School District Internet Acceptable Use Policy**. Please be sure you have read, understood and agree to that document before attempting to use the Internet.

Revised 9-3-02
